

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (currently amended): An electronic ticket management system comprising:  
an event organizer apparatus for ~~planning an event~~generating event information;  
an electronic ticket distribution authentication apparatus for distributing electronic ticket information that authenticates a right to attend the event;  
an information storage chip for storing the electronic ticket information; and  
an electronic ticket platform center for managing the distribution of the electronic ticket information,

wherein the event organizer apparatus ~~creates event information unique to each event,~~  
and registers the generated event information in the electronic ticket platform center;

~~wherein the said~~ electronic ticket distribution authentication apparatus authenticates  
~~receives a request to distribute the electronic ticket information concerning the event from a user~~  
~~of the information storage chip, performs distribution authentication processing for determining~~  
whether the electronic ticket information is to be distributed to ~~the~~ a user of the information  
storage chip be receiving a request for distribution of the electronic ticket information from the  
user, and registers an authentication result in the electronic ticket platform center as ticket  
issuing information; and

~~wherein the said~~ electronic ticket platform center ~~creates~~ generates an electronic ticket  
information master based on the event information registered by the event organizer apparatus,  
~~relates the ticket issuing information registered by the electronic ticket distribution authentication~~  
~~apparatus to the electronic ticket information master,~~ and performs ticket issuing processing for  
writing the electronic ticket information into the information storage chip based on the ticket  
issuing information, said ticket issuing information being registered in the electronic ticket  
distribution authentication apparatus based on the generated ticket information master.

Claims 2-13 (canceled).

Claim 14 (currently amended): ~~An~~ A method for electronic ticket distribution authentication apparatus for distributing electronic ticket information which authenticates a right to attend an event, wherein the electronic ticket distribution authentication apparatus comprising:  
generating event information at an event organizer apparatus;  
registering generated event information in an electronic ticket platform center;  
~~receives~~ receiving a request, at an electronic ticket distribution authentication apparatus, to distribute ~~the~~ electronic ticket information concerning ~~the event~~ events from a user of an information storage chip;  
~~performing~~ performs distribution authentication processing for determining whether the registered electronic ticket information is to be distributed to the requesting user;  
~~registering~~ registers an authentication result in ~~an~~ the electronic ticket platform center for managing the distribution of the electronic ticket information as ticket issuing information; and  
generating an electronic ticket information master and performs ticket issuing processing for writing electronic ticket information into the information storage chip based on the ticket issuing information, said ticket issuing information being registered in the electronic ticket distribution authentication apparatus based on the generated ticket information master. ~~instructs the electronic ticket platform center to perform ticket issuing processing for writing the electronic ticket information into the information storage chip of the user based on the ticket issuing information.~~

Claim 15 (original): An electronic ticket distribution authentication apparatus according to claim 14, wherein an event organizer apparatus for planning an event manages an allocation ratio of the electronic ticket information.

Claim 16 (original): An electronic ticket distribution authentication apparatus according to claim 14, wherein the request to distribute the electronic ticket information from the user is sent via a network.

Claim 17 (original): An electronic ticket distribution authentication apparatus according to claim 14, wherein an electronic ticket information distribution store terminal is provided, and

the request to distribute the electronic ticket information from the user is sent via the electronic ticket information distribution store terminal.

Claim 18 (original): An electronic ticket distribution authentication apparatus according to claim 14, wherein the electronic ticket information includes user information concerning the user of the information storage chip.

Claims 19-51 (canceled).

Claim 52 (currently amended): An electronic ticket management system using an information storage chip for storing electronic ticket information which authenticates a right to attend a specific event, the electronic ticket management system comprising:

an electronic ticket information forming unit for forming event information unique to each event, and for ~~forming~~ generating electronic ticket information in correspondence with event information, said electronic ticket information forming unit further generating an electronic ticket information master based on the event information;

an electronic ticket information writer for writing the electronic ticket information into the information storage chip; and

an electronic ticket information reader installed at an event venue corresponding to the event information, wherein said ticket information reader performs distribution authentication processing for determining whether the electronic ticket information is to be distributed to a user of the information storage chip based on the generated electronic ticket information master, and registers an authentication result in the electronic ticket information writer as ticket issuing information~~for reading the electronic ticket information stored in the information storage chip and for permitting a user of the information storage chip to enter the event venue only when the integrity of the event information stored in the read electronic ticket information is verified.~~

Claim 53-60. (canceled).
